Profile summary

Angular UI Developer with 4 years of overall experience, including 3.6+ years of hands-on experience in designing, developing, and maintaining responsive Single Page Applications (SPAs) using Angular (2+), TypeScript, HTML5, CSS3/SCSS, RxJS, and RESTful APIs. Experienced in developing scalable, reusable, and component-based applications by leveraging modern Angular features, including Standalone Components and Signals. Skilled in translating UI/UX designs, wireframes, and business requirements into high-quality, maintainable code with a strong focus on performance, accessibility, and responsive design. Proficient in collaborating with cross-functional teams, integrating REST APIs, participating in Agile/Scrum ceremonies, and delivering user-centric solutions that meet business objectives. Passionate about writing clean, efficient code and continuously learning emerging web technologies and Angular best practices.

KEY SKILLS

- **Programming Languages** : Typescript, JavaScript.
- **Frontend & UI Technologies** : Angular (2+), HTML5, CSS3.
- **Angular Framework Expertise** : Component-Based Architecture, Modules, Services, Dependency Injection, Routing, Guards, Lazy Loading, Reactive Forms & Template-Driven Forms, Rest API, Signals, RxJS (Observables, Subjects, Operators), Angular Material.
- **Testing & Debugging** : Unit Testing (Jasmine, Karma), Cross-Browser Testing, Debugging using Browser DevTools.
- **Development Tools** : Git, GitHub, Visual Code Studio, IntelliJ IDEA.
- **API & Integration** : RESTful Web Services, HTTP Interceptors, Error Handling & Authentication Flows.

PROJECTS UNDERTAKEN

Senior Software Engineer (LTIMindtree (LTM) /From: Feb-2026 - Till Now)

#project 1: Ministry of Corporate Affairs- Annual filling of requisite for companies in offline mode.

The MCA Offline System refers to the offline utilities and processes provided by the Ministry of Corporate Affairs (MCA), Government of India, which allow users to prepare and validate MCA forms without an active internet connection, and then upload them online to the MCA21 portal.

Roles & Responsibilities

- ✧ Analyzed Business requirement and user stories and translating them into effective technical solution without impacting end user goal.
- ✧ Implemented Reactive Forms With validations.
- ✧ Always seek to deliver development of requirements on time with client satisfaction.
- ✧ Implemented common components that can be share among the application.
- ✧ Worked on UI bug fixes and enhancements to improve application usability.
- ✧ Collaborated with backend teams, UI/UX Designers and stakeholders to align UI behavior with business rules and compliance requirements.

Angular Developer
(Leadwinner Corp/From: June-2022 – June-2025)

#project 1: Square Up – Government Fund Tracking Platform.

Business Domain: Government Financial Management & Public Sector Solutions.

Developed Square Up, a comprehensive web-based platform to streamline fund tracking, monitoring, and reporting for government departments and associated authorities, ensuring transparency and real-time financial visibility.

Roles & Responsibilities

- ✧ Designed and developed user-facing modules using Angular, TypeScript, HTML5, and CSS3 for seamless fund tracking workflow.
- ✧ Built interactive dashboards to visualize transactions, allocations, and utilization data.
- ✧ Implemented component-based architecture, routing, and reusable UI components for maintainability and scalability.
- ✧ Integrated REST APIs to fetch and display financial data securely across departments.
- ✧ Delivered interactive dashboards and forecast reports using Power BI for real-time stakeholder visibility.
- ✧ Collaborated with backend teams, UI/UX Designers and stakeholders to align UI behavior with business rules and compliance requirements.

#project 2: SCPAR – State Fund Management System

Business Domain: State-Level Scheme Management & Financial Operations

Designed and implemented FundTrack, a state-wide fund management solution to manage scheme implementation across State, District, DRDA, and Block-level administrations, enabling efficient fund allocation and vendor payment processing.

Roles & Responsibilities

- ✧ Developed responsive Angular-based UI modules for state officials, district authorities, and DRDA users.
- ✧ Implemented role-based screens and workflows for fund allocation, approval, and payment tracking.
- ✧ Integrated backend services using REST APIs to support fund distribution and status updates
- ✧ Assisted in documenting UI components and application flows for future scalability and maintenance

#project 3: E-CASE – Digital Case Management System (Government of Assam)

Business Domain: E-Governance & Judicial Case Management

Engineered E-CASE, a digital solution to modernize the registration and management of Criminal Procedure Code (CrPC) cases within district courts, enabling citizens and officials to manage legal workflows electronically.

Roles & Responsibilities

- ✧ Developed Angular-based interfaces for electronic case filing, tracking, and management.
- ✧ Implemented form-driven workflows using Reactive Forms for case registration and validation.
- ✧ Designed UI modules to support District Magistrate workflows, notice distribution, and case status updates
- ✧ Collaborated with legal domain experts and backend teams to align application behavior with judicial procedures.

Personal Portfolio Website | Angular 17+, TypeScript, GitHub Copilot, GitHub Pages/Netlify

- ✧ Developed a responsive personal portfolio website using **Angular 17+**, **Standalone Components**, **Signals**, TypeScript, HTML5, and SCSS.
- ✧ Leveraged **GitHub Copilot** to accelerate development, generate boilerplate code, improve productivity, and explore implementation approaches while validating and customizing the generated code.
- ✧ Showcased professional experience, technical skills, projects, and contact information with a modern, responsive UI.
- ✧ Optimized application performance using lazy loading, reusable components, and Angular best practices.
- ✧ Version-controlled the project using Git/GitHub and deployed it using **Netlify**.

Associate Customer Support
(Tech-Mahindra Ltd/From: Oct-2021 -April-2022)

Roles & Responsibilities

- ✧ Verified Aadhaar application documents with 99.8% accuracy, ensuring compliance with UIDAI standards.
- ✧ Approved valid submissions and rejected mismatches to prevent fraudulent applications.

EDUCATIONAL BACKGROUND

Qualification	Year of completion	Percentage
Bachelor of Engineering (Visvesvaraya Technological University, Belagavi)	(2014-2017)	60%
Diploma/Polytechnic (Department of Technical Education, Karnataka)	(2010-2014)	73%

I declare that the details above are correct and true to the best of my knowledge.
